CHANDRAMOULI DAS

Permanent - Kolkata - 700125, West Bengal, Current - Hyderabad | 9674078742 | @website | @email | @linkedin | @github

Professional Summary

Experienced Data Science Strategy Specialist with 6 years of expertise in predictive modeling, data processing algorithms, next-gen AI technologies, and LLMs. Demonstrated leadership in developing impactful solutions, team management. Seeking a Challenging Managerial Data Scientist role to leverage skills and drive strategic goals.

Experience

Senior Data Scientist | *Gramener - A Straive Company* *Mar 2025 – Present*
- Working on LexusNexus Risk Analysis Project, using Agentic RAG Model
- Working on Axis MaxLife Insurance Chatbot, Agentic LLM Architecture.

AI/ML Solution Architect | *Proxima Systems* *Sep 2024 – Mar 2025*
- Leading a team of 5 in building GenAI products, specializing in RAG and Agentic AI models.
- Architecting scalable LLM-powered solutions and driving AI/ML innovation.

Data Scientist | *Highradius Corporation* *June 2021 – Aug 2024*
- Led a team of 10+ in developing Deep Learning-based solutions using Transformers, LLMs, and other Machine Learning approaches for CashApp, Collections, Deductions, and Credit.
- Delivered AI-driven innovations within the AWS and Azure ecosystem, optimizing product performance at HighRadius.

Technical Assistant | *KIIT University* *June 2019 – May 2021*
- Full-time research role including B.Tech lab instruction, Python, ML, LLM.

Education

Kalinga Institute of Industrial Technology	**M.Tech., Computer Engineering - Data Science** | GPA: 9.06	*2019 – 2021*
International Institute of Information Technology	**PG Certification, Machine and Deep Learning** |	*2021 – 2021*
Bengal Institute of Technology	**B.Tech., Computer Science and Engineering** | GPA: 7.8	*2015 – 2019*

Projects

Sherlock GPT - Text to SQL | *GPT-4o, ML Models, Gen AI Solutions*
- Enhanced prompt engineering in GPT-4o to improve Text-to-SQL accuracy, aligning with the development and implementation of ML models and Gen AI solutions.
- Achieved schema adherence across various databases, contributing to quality control and timely delivery of AI solutions.

HR Document WhatsApp Bot | *RAG, LLMs, Meta Business API, AWS S3*
- Developed an AI-powered WhatsApp assistant enabling users to upload and query HR policy documents using Retrieval-Augmented Generation (RAG) techniques.
- Integrated with Meta Business Account for real-time messaging and optimized for secure document handling and cost-efficient storage with AWS S3.

JIRA Ticket Classification | *GPT-4o, NLP, ML Automation, JIRA APIs*
- Built an AI-driven system that auto-categorizes JIRA tickets by priority, type, and issue category using NLP and GPT-4o-based classification models.
- Enhanced ticket triaging and resource allocation through seamless JIRA API integration, improving workflow efficiency and response times.

Automated PH - HR Domain Product | *RAG-based Model, Vector Databases*
- Developed a RAG-based model leveraging vector databases, showcasing expertise in end-to-end ML deployment and predictive analytics.
- Created an unbiased, data-driven employee life cycle management system, driving innovation and efficiency in workflow automation.

Automated Custom Prompting Extraction - Cashapp Domain | *Gen AI, GPT-4 Turbo*
- Utilized a Gen AI approach with GPT-4 Turbo for entity extraction, aligning with the design of industry-specific AI/ML solutions.
- Developed a data-driven employee life cycle management system, contributing to the scaling of Blends Data Science practice.

Zoom Call Summarization | *LLaMA, Meeting Transcript Analysis, Summarization Automation*
- Built an in-house system using the LLaMA model to automatically generate structured summaries of Zoom meetings, highlighting key discussion points and action items.
- Automated transcript processing and insight extraction to enhance decision-making and boost meeting productivity through concise and accurate reporting.

Block Order Release Recommendation - Credit Domain | *Highradius Credit Product*
- Developed a predictive feature for Highradius Credit Product, demonstrating the ability to solve complex business challenges in the credit domain.
- Enhanced decision-making processes, aligning with the role's focus on collaboration with cross-functional teams for seamless execution.

Proactive Block Order Prediction - Credit Domain | *ML Algorithms, End-to-End Deployment*

- Created a predictive model for upcoming order blocks, showcasing expertise in ML algorithms and end-to-end deployment.
- Improved operational efficiency, contributing to the automation and optimization of workflows.

Deduction Validity Predictor - Deduction Domain | *Machine Learning, Statistical Analysis*
- Developed a machine learning-based approach to predict deduction validity, aligning with the role's focus on statistical analysis and feature engineering.
- Enhanced accuracy in deduction processing, contributing to quality control and timely delivery.

Payment Date Prediction - Accounts Receivable | *Machine Learning, Cash Flow Forecasting*
- Implemented a machine learning approach for cash flow forecasting, demonstrating expertise in classification and regression techniques.
- Improved cash flow management, aligning with the role's focus on solving complex business challenges.

CAC Optimizer - Deep Optimization Approach | *ML Algorithms, Predictive Analytics*
- Developed a deep optimization approach for CAC, showcasing expertise in ML algorithms and predictive analytics.
- Enhanced cost efficiency, contributing to the automation and optimization of workflows.

Stock Market Prediction - LSTM Approach | *LSTM Models, ML Models*
- Utilized LSTM models for stock market prediction, aligning with the development and implementation of ML models.
- Improved prediction accuracy, contributing to the role's focus on statistical analysis and feature engineering.

Awards and Certifications

PCAP™ – Certified Associate Python Programmer | *OpenEdge Python Institute* — *December 2023*
Machine Learning Specialization - IIT Roorkee — *Jan - Aug 2020*
Google IT Automation with Python - Professional Certificate — *Jul - Nov 2020*
Google It Support - Professional Certificate — *Feb - Jul 2020*

Technical Skills

Languages : Python, SQL, English, Bengali, Hindi
Frameworks and Libraries : TensorFlow, PyTorch, Keras, NLTK, NumPy, Pandas, Matplotlib, Seaborn, BERT, GPT-3, GPT-4
DevOps and Tools : Anaconda, Jupyter, Spyder, PyCharm, Postman, GitHub Copilot, Google Colab, MS Office, MS Excel, JIRA
Cloud Platforms : AWS components, Azure Cognitive Services
Generative AI Agentic Technologies : LangChain, LangGraph, OpenAI APIs, Pinecone, Hugging Face, Retrieval-Augmented Generation (RAG), Agentic LLM Workflows, Autonomous Agents, Prompt Engineering, Fine-Tuning
Core AI/ML Skills : Data Science, Machine Learning, Deep Learning, Generative AI, Natural Language Processing (NLP), Computer Vision, Transfer Learning, Predictive Analytics
Statistical and Analytical Skills : Probability, Statistics, Statistical Analysis,Hypothesis Testing
Modeling Techniques : Linear Regression, Logistic Regression, Decision Trees, Random Forest, XGBoost, Bagging, Boosting, Support Vector Machine (SVM), Artificial Neural Networks (ANN), Model Optimization
Deployment and APIs : REST APIs, End-to-End ML Deployment, Feature Engineering, Model Evaluation, Model Distillation, Optimization Algorithms
Project Management Skills : Agile Methodologies, Scrum, Sprint Planning, JIRA Ticket Management, Cross-Functional Collaboration, Documentation and Reporting
Industry Experience : Retail, CPG, BFSI, Healthcare, eCommerce, Digital Marketing Analytics (Google Analytics, Adobe Analytics)
Soft Skills : Communication Skills, Critical Thinking, Problem Solving, Strategic Thinking

Publications

Multi-Criteria-Based Entertainment Recommender System Using Clustering Approach | *Journal of ambitious hobby projects*
- This paper presents a novel entertainment recommender system that utilizes a clustering approach to enhance user satisfaction by considering multiple criteria.
- The study demonstrates significant improvements in recommendation accuracy and user engagement. DOI: 10.1002/9781119792437.ch3

Multi-Criteria recommender system using different approaches | *Conference on universal puns*
- Explores various methodologies for developing multi-criteria recommender systems, focusing on enhancing recommendation precision.
- The research contributes to the field by providing a comparative analysis of different approaches, highlighting their strengths and limitations. DOI: 10.1016/B978-0-323-85117-6.00011-X

CAC Optimizer : Deep Optimization based Multi-Criteria Recommender System | *Patent Filed*
- Introduces a deep optimization framework for multi-criteria recommender systems, emphasizing its potential for commercial applications.

Hobbies

Interests : Computer Gaming , Artificial Intelligence , Music , Stock Market , Long Rides
